INTERNSHIP REPORT

FULL STACK WEB DEVELOPMENT INTERNSHIP

Submitted by : Lakshmi priya K

Reg. No : 2403957610422058

Department : Computer Science and Engineering

Institution : National Engineering College, Kovilpatti

Organization : Doozy info Software solutions

Mentor : Mr. Mohan Raj, Founder

Duration : 2 June 2026 – 17 June 2026

COMPANY PROFILE

Doozy Info Software Solutions is a software development company specializing in web applications, software solutions, API integration, website hosting, database management, and digital services. The organization develops customized software solutions based on client requirements using modern technologies and development methodologies.

The company provides services in web development, application development, software testing, deployment, hosting, maintenance, and technical consulting. During the internship period, I gained practical exposure to real-time software development projects and industry practices.

CERTIFICATE OF COMPLETION

This report summarizes the knowledge, skills, and practical experience gained during my 16-day internship at Doozy Info Software Solutions from 02 June 2026 to 17 June 2026.

The internship provided hands-on experience in website analysis, frontend development, software testing, API documentation, API integration, database planning, website hosting, and customer module development. The training enhanced my technical knowledge and practical understanding of modern web development technologies and software engineering practices.

OBJECTIVES OF THE INTERNSHIP

- To understand software development workflows.
- To gain practical experience in website development.
- To learn frontend technologies and frameworks.
- To understand API integration techniques.
- To gain knowledge of software testing procedures.
- To understand database design concepts.
- To learn website hosting and deployment.
- To improve communication and teamwork skills.

DAY-WISE ACTIVITIES

Day 1 (02 June 2026)

Website Analysis

- Analyzed the Sri Anu Jewels website.
- Studied website structure and navigation flow.
- Examined customer-facing functionalities.
- Observed product categorization and display methods.
- Reviewed user interface design elements.
- Documented important features for future implementation.

Learning Outcome

Understood jewellery website architecture and customer workflow requirements.

Day 2 (03 June 2026)

Project Documentation

- Prepared documentation for the Venus Silver Jewellery Website.
- Identified customer and admin modules.
- Documented functional requirements.
- Discussed project workflow with team members.
- Organized feature descriptions systematically.
- Recorded implementation requirements.

Learning Outcome

Learned software requirement analysis and documentation preparation techniques.

Day 3 (04 June 2026)

Ctrl A Application Testing

- Tested various modules of the Ctrl A application.
- Verified application workflows.
- Identified non-working buttons.
- Observed validation-related issues.

- Checked navigation functionality.
- Reported identified bugs to the development team.

Learning Outcome

Improved software testing and debugging skills.

Day 4 (05 June 2026)

Frontend Development

- Developed customer-side webpages.
- Designed responsive user interfaces.
- Created navigation components.
- Developed product display sections.
- Designed payment-related pages.
- Integrated frontend workflow components.

Learning Outcome

Enhanced frontend development skills using HTML, CSS, and JavaScript.

Day 5 (06 June 2026)

Conversion to Next.js

- Analyzed project architecture.
- Evaluated framework requirements.
- Converted existing project into Next.js.
- Reorganized project folder structure.
- Implemented framework-based routing.
- Verified project functionality after conversion.

Learning Outcome

Learned modern web application development using Next.js.

Day 6 (08 June 2026)

Database Design and Enhancements

- Prepared database requirements.
- Identified required entities and tables.
- Planned customer-related data storage.
- Designed product and order structures.
- Discussed client-requested enhancements.
- Documented database workflow.

Learning Outcome

Learned database planning and requirement analysis.

Day 7 (09 June 2026)

Ctrl A Application Verification

- Re-tested previously reported bugs.
- Verified workflow execution.
- Checked navigation functionality.
- Validated button operations.
- Identified additional issues.
- Updated testing documentation.

Learning Outcome

Improved quality assurance and verification techniques.

Day 8 (10 June 2026)

API Requirement Documentation

- Analyzed project modules.
- Documented API requirements.
- Defined request-response structures.
- Identified module integrations.
- Prepared endpoint documentation.

- Reviewed API workflows.

Learning Outcome

Learned API design and documentation procedures.

Day 9 (11 June 2026)

Group Discussion

- Participated in web development idea discussions.
- Evaluated business opportunities.
- Analyzed project feasibility.
- Discussed advantages and disadvantages.
- Shared implementation suggestions.
- Contributed ideas within the team.

Learning Outcome

Improved communication and analytical thinking skills.

Day 10 (12 June 2026)

Website Hosting

- Learned deployment procedures.
- Used Plesk hosting platform.
- Uploaded website files.
- Verified website accessibility.
- Reviewed hosting configurations.
- Resolved deployment issues.

Learning Outcome

Learned website hosting and deployment concepts.

Day 11 (13 June 2026)

Demo API Testing

- Integrated demo APIs.
- Performed browser-based testing.
- Verified request handling.
- Verified response handling.
- Tested frontend-backend communication.
- Documented testing results.

Learning Outcome

Improved API testing and integration skills.

Day 12 (15 June 2026)

Authentication Module

- Implemented login functionality.
- Implemented registration functionality.
- Integrated authentication APIs.
- Verified validation mechanisms.
- Tested request-response handling.
- Reviewed authentication workflow.

Learning Outcome

Learned authentication module implementation and integration.

Day 13 (16 June 2026)

Photoshop and API Integration

- Edited project assets using Photoshop.
- Updated project resources.
- Integrated additional APIs.
- Verified frontend-backend communication.
- Tested module functionality.

- Refined project implementation.

Learning Outcome

Enhanced design and API integration skills.

Day 14 (17 June 2026)

Customer Module Development

- Developed customer-related modules.
- Implemented profile management features.
- Integrated customer APIs.
- Verified data retrieval operations.
- Tested update functionalities.
- Performed end-to-end testing.

Learning Outcome

Learned customer module implementation and workflow testing.

CONCLUSION

The internship at Doozy Info Software Solutions was a valuable learning experience that provided practical exposure to Full Stack Web Development. During the internship, I gained hands-on experience in website development, software testing, API integration, database planning, and website hosting. Working on real-time projects helped me improve my technical knowledge, problem-solving abilities, and teamwork skills.

The internship also enhanced my understanding of industry practices and software development workflows. It helped me apply theoretical concepts in practical situations and develop confidence in working with modern web technologies. Overall, the internship contributed significantly to my academic and professional growth and provided a strong foundation for my future career in software development.
